

include/sale_html.h

src/main.cpp

src/sale_html.cpp

```
graph TD; A[src/main.cpp] --> C[include/sale_html.h]; B[src/sale_html.cpp] --> C
```

The diagram illustrates a dependency relationship between three files. Two files, "src/main.cpp" and "src/sale_html.cpp", are shown at the bottom in separate boxes. They both have blue arrows pointing upwards towards a single file, "include/sale_html.h", which is enclosed in a larger gray box at the top. This visualizes how multiple source files include a common header file.
